GARDENSIDE NURSERIES, INC.  
SHELBURNE, VT.

SPRING PRICE LIST.

This Folder is sent you in place of our Annual Catalog. Others will mailed during the Summer. In order to lower the prices on our plants and still maintain our prepaid feature, our method of handling, and the quality of the plants we ship, it has been necessary to reduce the sales cost.

On the following pages are listed such of the very complete line of PLANTS which we have always grown, as we feel are of more than usual interest to our friends. All the others, and TREES, SHRUBS, VINES and EVERGREENS, are being grown, tho not listed here, and anything we have ever offered may still be had. Please write us for information.

Prices on all plants include delivery to the customer, by the best method, except that in Canada and West of the Mississippi River, 5% additional is required to cover extra cost. PLEASE NOTE--5 plants, all alike, will be sent at the 10 rate; 25, all alike, at the 100 rate.

We use great care to avoid mixtures, and to send out only plants of strong healthy growth, true to name. But as errors do occur and plants fail to grow for reasons beyond our control, we will not be responsible for any failure in growth, and in no case for more than the value of the plants supplied. Errors will be cheerfully corrected.

SHELBURNE HYBRID LILIES.  
(Lilium sargentiae x Lilium regale.)

These new Hybrid Lilies are a distinct advance over any other form or hybrid of the Regal Lily, yet sent out. Growing side by side with both parents, and with Lilium princeps, on our own sandy loam and on heavy clay soil, they have been taller and more vigorous; have had heavier flower heads, and larger individual flowers; and have been better, even from small, young bulbs, than established plantings of the older varieties.

Being later than any other Regal type, they prolong the season to a time when they are greatly appreciated. In 1932, we cut flowers well into August. By planting Regal, Princeps, and Shelburne Hybrids, together it is possible to have the long fragrant trumpets of these beautiful Lilies from late June, thru July, and part of August. Small bulbs will carry two to three flowers, and the larger ones had from six to ten flowers, last season.

FINE LARGE BULBS, \$5.00 each. FLOWERING SIZE, \$2.00 each; 10 for \$15.00

We also offer a quantity of FIRST GENERATION SEEDLINGS of this new Lily. Identical in most respects with the parent, but may vary in coloring.--SMALL FLOWERING BULBS, \$1.00 each; 10 for \$8.00.

PRINCEPS SEEDLINGS. The Princeps type seems well fixed, and these seedlings flower later than Regal, but before Shelburne Hybrid. They are not so tall as the latter, but stronger than Regal, which they resemble.

STRONG FLOWERING BULBS, \$1.00 each; 10 for \$8.00.

## FIELD GROWN ROCKERY PLANTS.

The following are all growing in our fields, and are strong, healthy, plants. In many cases they have been offered by us previously as 2" potted plants, and fuller descriptions may be found in the earlier circular. Others cannot be offered in that way, and are found here for the first time.

-----  
 Priced at -25¢ each; 10 for \$1.75; 100 for \$15.00, except as noted.  
 -----

ABONIS AMURENSIS FL. PL. A fine early spring flower, resembling a Dandelion. 6 to 8 inches high. Appears in April here. Rare. 50¢ each.

ALYSSUM SPINOSUM. A rare little Alyssum, with white or rose flowers, at the tips of hard spiny growths, which form a rounded mound.

DIANTHUS ARENARIUS. Fine for hot dry places. Grows about five inches high, flowers white or purplish, fragrant, deeply fringed. Compact plant.

D. ARVENENSIS. 3-4" high, grey foliage in a compact mound. Flowers pink.

D. DELTOIDES, MAJOR STERN. A prostrate carpeting Pink, covered with a profusion of dark pink flowers in June and July. Foliage of this new sort is dark red, and showy at all times. Fine for covering large areas, but not too strong and coarse growing.

D. FREYNI. A very compact sort, with grey foliage, and soft pink flowers.

D. LIBOSCHNITZIANUS. Grows about one foot high. White flowers.

D. PETRAEUS. Close tufts of distinctive foliage. White flowers.

DRABA MAWEI. A low, densely tufted patch of bright green rosettes. White flowers, in quantity, in midsummer or earlier. 35¢ each; 10 for \$3.00

D. OLYMPICA. Tight rosettes of mossy-like foliage, forming a close turf, and covered in Spring with golden flowers. 35¢ each; 10 for \$3.00.

D. REPENS. Not at all like the others, but a fine cover for large surfaces. In late May, it is a sheet of golden flowers. Prostrate, leafy growths.

HELIANTHEMUM APRICOT. The Rockroses are among our finest plants for use in the dry, sunny, Rockery. Not only do they need and thrive in hot, dry places, but they flower in midsummer, when bloom is scarce, and continue for a long time. This is a peculiar shade of pink. 35¢ each; 10 for \$3.00

H. ROULE DE FEU. A very double bright red sort. One of the best. 35¢ each.

H. BURNT ORANGE. Deep orange, tinged red. 35¢ each; 10 for \$3.00.

H. LEMON. A very pale yellow. 35¢ each; 10 for \$3.00

H. MRS. EARLE. A single scarlet variety. One of the brightest. 35¢ each.

H. ORANGE. Similar to, but lighter than, Burnt Orange. 35¢ each.

H. ROSY GEM. A fine rosy pink form that is very attractive. 35¢ each.

IRIS CRISTATA. This little Iris, blooming very early, is charming at all times. The porcelain-blue flowers are attractive, and the leaves are a fine foil for other flowers, when planted above them, on a bank. Likes a little shade, and may be naturalized at the base of trees, in woodland. 15¢ each; 10 for \$1.25; 100 for \$12.00; \$100. per thousand.

I. CRISTATA ALBA. A pure white form of the preceding. Very rare. \$1.00 each

SCUTTELLARIA ALPINA. A prostrate plant, something like a Nepeta, but with larger flowers, of Snapdragon shape, and an attractive blue and white color. 35¢ each; 10 for \$3.00

All prices include delivery, except as noted on Page 1.

## Rockery Plants, -con.

- SAXIFRAGA AIZOON ALBA. Fine encrusted type. 35¢ each; 10 for \$3.00. \$3.  
S. AIZOON BALCANA ROSEA. Flowers brightly spotted pink. 35¢ each; 10 for \$3.00.  
S. AIZOON BALDENSIS. A tiny encrusted type, very interesting. Forms a large mat. White flowers. 35¢ each; 10 for \$3.00.  
S. CERATOPHYLLA. Forms a 6-8" mound of finely cut green foliage, and carries many short sprays of white flowers. 35¢ each; 10 for \$3.00.  
S. CRUSTATA. One of the best encrusted types. 35¢ each; 10 for \$3.00.  
S. FLAVESCENS. A yellow flowered encrusted type. 35¢ each; 10 for \$3.00.  
S. GAUDINI. Large rosettes, tinged red. Flowers white, spotted pink. 35¢.  
S. LAGAVEANA. One of the best encrusted types. Rosettes are about  $\frac{1}{2}$ " in diameter, but form rapidly, quickly making a mat. Neat, and easily grown.  
S. MACNABIANA. A large encrusted type, with tall sprays of white flowers. One of the finest sorts, and easily grown, anywhere.

SEMPERVIVUMS. From the collection of Hen and Chickens, which we have assembled, a few varieties stand out as of particular interest, and are distinct enough to permit naming with reasonable certainty. We offer the following sorts, which we are confident will please.

- S. ARACHNOIDEUM. The Cobweb Houseleek is distinguished by the grey web which connects the tips of the leaves, and covers the center of the plants. A small variety, which only occasionally flowers.  
S. BLANDUM. A large variety,  $2\frac{1}{2}$  to 3 inches across. Pale green foliage.  
S. CALCAREUM. In our opinion, the finest of the Genus. Pale blue (glaucus) foliage, the tip of each leaf attractively colored red-purple. We offer strong plants from  $2\frac{1}{4}$  inch pots, at 50¢ each.  
S. FAUCONETTI. This is distinct, in that the leaves are not flat, but tend to an erect, needle-like, growth. The rosettes are not large, and there is a tendency to the cobweb growth. Flowers bright rose.  
S. GLAUCUM. Large rosettes, 2-3 inches in diameter, of a glaucous green color, with a slight red-brown tip. Flowers large, pale or bright red.  
S. JURATENSE. This resembles tectorum, but is very deeply colored in Spring, and while it fades, it is still dark all the year.  
S. LAGGERIS. A larger Cobweb Houseleek, rather deeper colored leaves. Flowers are bright rose. A better plant than arachnoideum.  
S. PALLIDUM. A large variety, blue green leaves, turning purplish, and tipped brown. Sometimes 4-5 inches across.  
S. PITTONI. This variety is covered with a fine hairy growth, so that the leaves appear made of plush. Grows to 3 inches across, with us. Flowers are small, and clear yellow.  $2\frac{1}{4}$ " pots, 50¢ each.  
S. PYRENAICUM. This is said to be a form of the Roofleek (tectorum). In any case, it is distinct, and an interesting variety.  
S. REGINA AMALIA. Large flat rosettes, blue-green foliage tipped red-purple. Flowers are pale yellow. This variety increases slowly, and is very rare.  $2\frac{1}{4}$ " pots, 50¢ each.  
S. SOBOLIFERUM. We are convinced that this variety is correctly named. It is one of several that is sent out as globiferum. Before deciding, we have carefully checked the descriptions of both sorts. Large flattened rosettes, which carry many small glandular buds well up on the sides. These remain attached to the parent until mature, then roll off.  
S. THEOBALDI. Correvon says that this is a hybrid between wulfeni and montanum. Our variety is very prolific, the central rosette of fair size. Its finest feature is the deep red coloring of the leaf tips.  
S. TRISTE. This remains the finest deep colored sort, we have seen. Its color is a fairly bright maroon, over the entire plant. The rosettes are 3 inches across, and increase rapidly. Does well everywhere.

All prices include delivery, except as noted on Page 1.

## Rockery Plants, -con.

SILENE VIRGINICA. This native plant is perfectly hardy here. It has the brightest red flowers of any of the family. Grows 18 inches high.

STATICE DUMOSA. A small Sea Lavender, with neat heads of white flowers, fine for drying. Plant is just the right size for the Rockery.

TALINUM CALYGINUM. We have previously described this plant, fully. It is one of the best midsummer Rockery plants we have. Even tho the roots may not winter over, sufficient seedlings will come up to maintain it and these always flower by July, and continue until frost.

TEUCRIUM CHAMAEDRYIS. A fine dark green leaved specimen plant, with attractive rose-purple flowers in midsummer. Useful for an edging, and can be closely clipped. Heavy field plants, 30¢ each; 10 for \$2.00

UMBILICUS CHRYSANTHA. Like a very woolly Sempervivum. Increases rapidly and makes a large clump. Branching sprays of straw-yellow flowers in midsummer. Interesting and unusual. Perfectly hardy

THYMUS CITRIODORUS. The Thymes are all favored for the Rockery, because of their carpeting powers, and the delightful fragrance of the foliage. This is the lemon scented variety, grey foliage, neat clumps, 18" high.

T. CIT. AUREUS. Golden form of the preceding. Not so tall growing.

T. HERBA BARONNA. A prostrate sort, growing only 2-3" high. The dark green leaves have the pungent fragrance of Caraway. Fine for walks.

T. SERPYLLUM COCCINEUM. Useful for walks, as it is very prostrate. Also fine for carpeting in the Rockery, and is covered in midsummer with deep rose colored flowers. Large plants.

T. SERP. LANUGINOSUS. The Woolly Thyme. A form of the preceding, with grey woolly foliage. A fine Rockery specimen, but too soft for paths.

VERONICA CORYMBOSA STRICTA. All the prostrate Veronicas are useful in the Rockery. This one is dwarf, grows 10" high, with dark blue flowers in July. The foliage is dark green, glossy, the plant compact. A fine flower.

V. ELEGANS. This is similar to the preceding, is more slender, slightly taller, and blossoms just a little earlier. Fine dark blue.

V. ERICA BLUE. A heather-like Speedwell, growing one foot high. This has blue flowers, and is useful to prolong the season of the preceding.

V. INCANA. Hoary Speedwell. One of the finest sorts. The silvery grey foliage is always attractive, and is an effective foil for the dark blue flowers. 30¢ each; 10 for \$2.00

V. ORCHIDEA. Similar to elegans, with clear blue flowers. These varieties which are much alike, do not flower at the same time, and may be combined to afford a long period of bloom.

V. RUPESTRIS. A prostrate, strong growing sort, for carpeting banks. Blue.

V. RUPESTRIS ALBA. White form of the preceding.

V. RUP. FLEXUOSA. An even lower form. Blue flowers. One of the best.

V. RUP. NANA. Smaller and less rampant than the type. Blue flowers.

V. TEUCRIUM. Grows 18" high, with trailing stems, and makes a thick mat, covered with blue flowers in May and June. Fine for edging dry paths.

V. THE DWARF. Similar to the preceding, but with shorter growths.

V. TREHANI. A prostrate Veronica, with bright golden yellow foliage. Blue.

YUCCA COLOMA. This dwarf Yucca, from Colorado, is a fine Rockery specimen as it grows only about 12" high, with slender leaves. We have been short of this for some years, but now have a good supply. 75¢ each.

## ROCKERY PLANTS FROM SMALL POTS.

We still have available a good supply of the following plants, from 2 inch pots, which we offered and described in our January 15th circular. These little plants are a fine way to obtain new and unusual varieties at low cost, and are exceptionally useful in the Rockery, as they can easily be planted in small crevices. We shall not be able to accept order for these after May first, but we can delay shipment until about June 15-20.

-----  
 Except as noted, 25¢ each; five (alike) for \$1.00.  
 -----

ACHILLEA ATZOOK.  
ACHILLEA SERBICA.

FESTUCA GLAUCA. 15¢ each; 5 for 60¢.

GENTIANA SINO-ORNATA. 50¢ each.

ANDROSACE SARIENTOSA PRIMULOIDES.

HELIANTHEMUM APRICOT.

ANEMONE SEPTEMBER CHARM.

HELIANTHEMUM BOULE DE FEU.

HELIANTHEMUM RHODANTHE CARNEUM.

ARENARIA MONTANA.

HYPERICUM POLYPHYLLUM.

CHRYSANTHEMUM APELLIA. 35¢ each.

TEUCRIUM CHAMAEDRYS. 20¢ each; 5 for 75¢; 25 for \$3.00

DIANTHUS ARVENENSIS. (All

DIANTHUS FREYNI. Dianthus,

DIANTHUS LIBOSCHNITZIANUS. 15¢ ea.

DIANTHUS PETRAEUS. 5 for 60¢)

D. HYB. BEATRIX. 25¢ each,

TUNICA SAXIFRAGA DBL. PINK.

UMBILICUS CHRYSANTHA.

DRABA HIRTA.

VERBENA VENOSA.

DRABA MAWEI.

DRABA OLYMPICA.

VIOLA SYLVESTRES ROSEA.

-----  
 POTTED TROLLIUS SEEDLINGS.  
 -----

We can offer a fine strain of seedlings of Hybrid Trollius, grown from seed saved from the finest named varieties. These seedlings are now one year old, and are potted into 2 inch pots, for delivery in May, or at any later date to July first. These are strong young plants, and if planted in a moist, but well drained, loamy soil, they will grow rapidly, and a large part may be depended upon to flower during the summer. The greatest value, however, lies in the strong clumps, well established, that will result, and Spring of 1934 will show a wealth of bloom.

-----  
 Each, 20¢; 10 for \$1.50; 100 for \$12.50.  
 -----

WHITE LIATRIS SEEDLINGS.

During 1932, we raised a crop of seedlings of the new *Liatris scariosa alba*. We have no idea what will result. Some should be white, and other colors may appear. 20¢ each; 10 for \$1.25; 100 for \$10.00

## BEDDING VIOLAS AND HARDY FRAGRANT VIOLETS.

We have a fine stock of plants of all of the following, growing in our fields, and available for early Spring delivery. They are one year old, wintered outside, and have good, strong, root and top systems. Planted early, they will give a profusion of bloom during the Spring and early Summer. During hot weather, they are more likely to stop flowering, than the smaller potted plants we offer, but if the tops are cut back severely, and water and cultivation given, they will start new growths which will again be covered with flowers in Fall.

Bedding Violas.

Viola Apricot.  
Viola Jersey Gem.  
Viola White Jersey Gem.  
Viola Jersey Jewel.  
Viola Portland Gem. 35¢ each.

Sweet Violets.

Double Russian.  
Single Russian, 50¢ each.  
Odorata Blue.  
Rosina.

The above, except as noted, all at / The above, except as noted, all at  
25¢ each; 10 for \$1.75; 100 for \$15. / 30¢ each; 10 for \$2.50; 100 for \$20.

We have a plentiful supply of these Violas and Violets in strong young plants from 2 inch pots. These are an excellent purchase, being both economical and satisfactory. Tho they do not flower quite so early as field grown plants, they are more persistent summer bloomers.

Bedding Violas.  
2" pots.

10 for \$1.50; 25 or more, 10¢ each.

Viola Apricot.  
Viola Jersey Gem.  
Viola White Jersey Gem.  
Viola Portland Gem.  
Viola Betty.

Sweet Violets.  
2" pots.

25¢ each; 10 for \$2.00.

Double Russian.  
Single Russian.  
Odorata Blue.  
Odorata White.  
Rosina.

## ENGLISH BEDDING VIOLAS.

The following are among the choicest Violas grown. These are not seedlings, but plants propagated from imported stock plants.

MAGGIE MOTT. A fine pale mauve, very large, slightly fragrant.

MOSLEY PERFECTION. The best deep golden yellow sort. Plant is compact.  
From 2" pots, 50¢ each.

## CANTERBURY BELLS AND FOXGLOVES.

Canterbury Bells, -Blue, White, Pink. 20¢ each; 10 for \$1.50; 100 for \$12.00

Foxgloves, -Gloxinoides mixed; The Shirley Strain; Isabellinae (yellow);  
Lutz Hybrids (salmon shades). 20¢ each; 10 for \$1.50; 100 for \$12.00.

All prices include delivery, except as noted on Page 1.

## SMALL LILIES FOR THE ROCK GARDEN.

The following Lilies are the best sorts for the Rockery, altho they may be planted in the Perennial Border. All are grown here, are of flowering size, and should flower this year, if at all happily located. They will continue for years, but large bulbs of these varieties are very likely to give one burst of bloom, then disappear.

TENUIFOLIUM. The Coral Lily. The brightest colored gem in the Lily world. At its best, will grow three feet high and carry 20 of its coral red blooms. Low in price and can be used in quantity. First size bulbs.

Each, 20¢; 10 for \$1.50; 100 for \$20.00; \$175. per thousand.

A smaller size bulb, that will flower the first season, is offered in lots of not less than 50, for \$4.00; 100 for \$7.50; \$60.00 per 1000.

TENUIFOLIUM, GOLDEN GLEAM. A golden yellow form of the Coral Lily, that is equally good, and easily grown. Now plentiful and moderate in price.

AMABILE. A slender Lily, growing about 24-30 inches high, and carrying a cluster of drooping, dull red, Turkecap blooms. Much like a miniature Tiger Lily, but not coarse. Easily grown.

CALLOSUM. Foliage much like tenuifolium, but on a taller stem. The flowers are small, the size and shape like the Coral Lily, but the color is a dull brick red. Odd, but good.

CERNUUM. One of the loveliest small lilies. The Coral Lily, in a lavender pink shade. The bulb is smaller than tenuifolium, but the plant is of the same strong slender growth. Easily grown, but very scarce and rare.

CONCOLOR. This Lily equals the Coral Lily in brilliant color, but is of a different type. Grows 2-3 feet high, and has from 1 to 5 upright, cup shaped flowers, of a brilliant orange scarlet color. Fine healthy bulbs.

PRICE OF ABOVE, except as noted - 35¢ each; 10 for \$3.00; 100 for \$20.00.

## SPECIAL COLLECTION OFFER.

We will send 100 bulbs, not less than 10 of each of the above, for \$15.  
Half the above, not less than five of each, \$8.00.

## SMALL LILY BULBS FOR GROWING ON.

The following varieties of Lilies are available in small bulbs, either one or two year old seedlings. Some few will flower the first year, - all should flower well in two years. If you wish to obtain a quantity of Lilies at low cost, here is the way to do so. They can be readily grown in a bed or a broad row, in the average home garden.

## PERENNIALS, NEW AND OLD.

The following are all strong, field grown plants. Prices vary, and the single price only, is given. Where prices are 25¢ each, 10 will be sent for \$1.75 and 100 for \$15.00. If 30¢ each, 10 will be sent for \$2. Five, alike at the 10 rate, twenty five alike at the 100 rate.

ACONITUM AUTUMNALE. Fall flowering Monkshood. Tall stems of dark blue flowers, over glossy foliage, in August and later. 25¢ each.

A. NAPELLUS, SPARK'S VARIETY. A July bloomer, with branching flower heads. Fine for cutting. About the best Monkshood. 25¢ each.

ALYSSUM MONTANUM. A small species, with silvery hoary leaves and sweet scented yellow flowers. Useful for edging, and Rockery. 25¢ each.

ANCHUSA MYOSOTIDIFLORA. One of the finest Spring flowering plants. Much like Forget-me-not, in flower, but more permanent. The fine foliage is attractive all summer. Plant near golden daffodils. 25¢ each.

ANEMONE MAGELLANICA. Grows one foot high, with creamy yellow flowers. 25¢

A. PULSATILLA. A fine Spring flowering sort, with violet purple bells on hairy stems. Likes a lime soil. 25¢ each.

A. PULSATILLA ALBA. White form of the preceding, very choice and rare. 50¢

A. VERNALIS. The loveliest Spring Anemone. White cups, flushed light blue outside. Blossoms very early. Likes light soil, full sun. 30¢ each.

ANTHERICUM RAMOSUM. Tufts of grass-like foliage, 2 foot stems of white flowers in a graceful raceme. Midsummer to Fall. 30¢ each.

AQUILEGIA HENSOL HAREBELL. A fine new Columbine, with vivid, violet-blue flowers in great profusion, on plants of medium height. Distinct. 30¢.

ASCLEPIAS TUBEROSA. Butterfly Weed. A fine midsummer bloomer, affording a bright orange patch of color over a long period. Heavy roots, 25¢ each. We also offer a quantity of fine young roots, will flower after one year, suitable for growing on, or for naturalizing, at 10 for \$1.00.

DIANTHUS FURST BISMARCK. A hybrid Pink, much like a Sweet William, with bright rose flowers appearing throught the summer. 30¢ each.

D. HIGHLAND QUEEN. A form of D. plumarius, with bright crimson flowers. Fine for bright color. Very fragrant. 25¢ each.

ERIOPHYLLUM CAESPITOSUM. Makes a large clump of grey foliage, covered with bright golden yellow, daisy-like flowers in June and July. Fine for dry Rockery, or bank, and for cutting. 25¢ each.

EUPHORBIA MYRSINITES. Fleshy trailing stems, and leaves of grey-blue, with large yellow flower heads in May and June. 30¢ each.

E. POLYCHROMA. Makes a fine showy clump of yellow, early in the season. Grows about 15 inches high. Fine foliage all season. 30¢ each.

GAILLARDIA GOLDEN GLEAM. A fine pure golden yellow, with not a trace of the objectionable red. Splendid for midsummer bloom. 35¢ each.

G. PRESIDENT HOOVER. A bronzy red, quite distinct from all other Gaillardias. Admired by all. New and unusual. 35¢ each.

## Perennials, -con.

GYPSOPHILA BRISTOL FAIRY. The popular new Double Baby's Breath. Heavy field grown roots. 50¢ each.

INCARVILLEA DELAVAYI. An unusual plant and satisfactory in dry light soil. The much incised foliage is surmounted by strong stalks of Gloxinia-like flowers, rosy purple and very handsome. 50¢ each.

IRIS KAEMPFERI, GOLD BOUND. The finest white Japanese Iris. Strong heavy clumps at a very low price. 25¢ each.

I. KAEMPFERI HYBRIDS. A fine mixed strain of Japanese Iris. 25¢ each.

IRIS SIBIRICA. We have been collecting varieties of the grassy Iris, which have been much improved of late. They are splendid for waterside planting, but grow equally well in the garden, where they make a bold effect. We have used them, planted closely, to confine more rampant plants

I. BUTTERFLY. Soft blue, with sky-blue standards. 3 feet high. 25¢ each.

I. EMPEROR. Rich violet blue. Largest flowered and most beautiful. 25¢

I. FLORRIE RIDLER. Large, well-formed flowers, falls brilliant rich blue. Very highly considered in England. 25¢ each.

I. PEGGY PERRY. A beautiful variety, standards brilliant dark blue, broad falls standing at right angles of a brilliant purple blue. 25¢ each.

I. PERRY'S BLUE. Extra large flowers, standards sky blue, falls "Old China Blue". Considered the finest variety. 25¢ each.

I. SUNNYBROOK. Alice-blue. Dwarf, only about 30" high. Extra good. 25¢ each.

I. SNOW QUEEN. Large pure white flowers. 25¢ each.

LIATRIS SCARIOSALBA. A white form of the Kansas Gayfeather. 50¢ each.

LUPINUS, MIXED HYBRIDS. A fine strain of hybrids of this popular garden plant. Wide range of colors, blue predominating. 35¢ each.

MONARDA, LEMON SCENTED. This we think is *M. citriodora*, a Western form. It came to us from an old garden. About 2' high, with rough leaves. Makes a large clump. The flowers are inconspicuous, but the fragrance of the leaves, is delightful. 25¢ each.

PAPAVER ORIENTALE, MRS. PERRY. The soft pink color of this Poppy, makes it the most popular variety grown. Strong field plants. 25¢ each.

PHLOX. We have strong plants of the following new varieties, which are considered great improvements over older sorts.

A. L. SCHLAGETER. Bright scarlet crimson, with orange sheen. Strong grower, and resistant to rain and sunburn. 30¢ each.

EMAIN MACHE. A low growing variety, with flowers of a warm, glowing, deep flaming red. Fine for Rockery. 30¢ each.

GEORGE STIPP. Carmine, with violet pink center. 30¢ each.

RIGOLETTO. Enormous clusters of fine dark carmine-lilac blooms, edged with light maroon. Valuable for mass effects. 30¢ each.

SALMON GLOW. Lively flame pink, with salmon shades, softened with lilac and white tints at the center. The whole effect, a rich salmon. 50¢ each.

PULMONARIA SACCHARATA. An old garden plant with attractively spotted leaves. The flowers resemble *Mertensia*, but are pink. They appear in early Spring, and the foliage is good all summer.

YUCCA FILAMENTOSA VARIEGATA. This Yucca has leaves attractively edged with golden yellow. It is very attractive and worthwhile. 60¢ each.

COLLECTIONS.

The following combinations are offered to assist those who do not care to select definite varieties at the single rate. There are no obsolete sorts in the lot, all are good standard varieties, well grown, carefully packed, correctly labelled.

ALLIUMS.

We have fifteen different species of Allium. A collection of 10, all different and all labelled, moderate sized divisions, for \$2.00.

ASTILBE.

We will send one each of the ten different Astilbes, that we grow, all correctly labelled, for \$4.50.

HEMEROCALLIS.

In our Nursery are growing 30 distinct, choice, named varieties and species, including the best of the Betscher hybrids. We will send 10 strong divisions, our choice, and including Hyperion, all labelled, for \$15.00. Our choice of five, all good new varieties, for \$5.00.

HEUCHERAS.

From our collection of 18 different Coral Bells, we offer an assortment of 10, two each of five good varieties, for \$3.00.

TROLLIUS.
